

FOOD SAFETY BULLETIN

Food Supplements

Food supplements are concentrated sources of nutrients or other substances with a nutritional or physiological effect such as vitamins, minerals, amino acids, fatty acids, enzymes, probiotics, various plants and herbal extracts. Dietary supplements are products designed to augment your daily intake of nutrients, including vitamins and minerals. Many are safe and offer significant health benefits, but there are some that pose health risks, especially if overused. In the USA, food supplements are regulated by the Food and Drug Administration (FDA) under the Federal Food Drugs & Cosmetic Act (FD&C Act). In the EU food supplements are regulated by the European Food Safety Authority (EFSA).

ADPEN can analyze your products and provide Certificate of Analyses (COA) that are aceptable to your clients of Amazon for product sales in their website. We can ensure the safety and quality of your raw materials and finished products by providing the Best testing services available worldwide.
